Video Tabs

Enable training tabs in applications. The home tab will now feature the free 5 minute How Do I? video series.

Keyboard shortcuts to increment/decrement the selected date in the date input control

Keyboard shortcuts now increment/decrement the selected date. [,] will go back 1 day in time relative to the currently selected date. [.] will go forward 1 day in time relative to the currently selected date.

Increase date picker available date range

Increased the available date range in the date picker control to -100 years in the past through +10 years in the future

NOTE (Excel Export)

Export to Excel now allows more than 65,000 rows, currently it is set at 500,000. When you export to Excel however it will put the first 65,000 rows in the first tab and then the next 65,000 rows in the second tab and so on until it exports all the rows or reaches the 500,000 row limit. If you need more than 500,000 please contact me. Vic Kiel x7418 or vic.kiel@wwu.edu
